PROFESSIONAL PROFILE

Sport Management and Business Analytics student who turns unstructured data into decisions people actually act on. Builds statistical models and visualizations that surface the root problem, then explains the results to people who care about the answer, not the math. Manages several projects at once without losing the details that matter and works well in teams that need someone who follows through. Most interested in where machine learning meets real business tradeoffs: what a model changes about a decision, not the model for its own sake. Seeking a Business Analytics internship for Summer 2027.

EDUCATION

Quinnipiac University, **School of Business,** Hamden, CT
Bachelor of Science in Sport Management — Expected May 2028
Bachelor of Science in Business Analytics — Expected May 2028
- GPA: 3.64

EXPERIENCE

Wichita Falls NetBurners Basketball Club, Wichita Falls, TX — November 2026 - Present
Basketball Analytics Intern, Remote Internship
- Analyze game film and statistical data to evaluate individual and team performance, identifying trends in offensive and defensive efficiency
- Help develop postgame analytics reports highlighting key performance indicators, player effectiveness, and actionable insights to support coaching decisions
- Assist with season-long performance tracking to support data-driven basketball operations and strategic decision-making

Quinnipiac University Baseball, Hamden, CT — February 2026 - Present
Student Manager
- Build pitcher scouting reports from TrackMan data, analyzing pitch arsenal tendencies, count-specific sequencing, and handedness splits to inform opponent game-planning
- Capture and validate TrackMan pitch-tracking data (type, velocity, movement) during live games, maintaining a clean dataset the coaching staff and analytics group rely on for scouting and player development

Quinnipiac University Men's Basketball, Hamden, CT — September 2025 - Present
Student Manager
- Support individual workouts and game-day operations for a Division I men's basketball program with 15 student-athletes
- Facilitate communication among players, coaches, and staff to streamline operations in high-pressure game environments

Westfield Starfires (FCBL), Westfield, MA — May 2025 – August 2025
Sabermetrics Assistant, Volunteer
- Designed three data collection systems tracking first-pitch outcomes, structuring the data to isolate hitter and pitcher tendencies by count and situation
- Analyzed first-pitch outcome data to identify swing and take tendencies, delivering findings that shaped coaches' in-game decisions on player aggression

RESEARCH

Quantifying the Tunnel: How Plate Distance Difference Affects Whiff Probability — April 2026
Undergraduate Researcher, advised by Dr. Deokkyung Ock — Quinnipiac University
- Developed Plate Distance Differential (PDD), a metric quantifying plate-position change between pitches, using a Generalized Linear Mixed Model on 2025 MLB Statcast data; found each 1-inch increase raised whiff probability by 25.3% ($p < 0.001$)
- Presented findings at the Tri-State Sport Management 2026 Annual Summit Poster Presentation, Hackensack, NJ

INTERESTS

Marathon Runner, Ultimate Frisbee player, Interested in basketball and baseball analytics

SKILLS

Computer: Microsoft Excel (Financial Modeling, Pivot Tables), Word, Access, PowerPoint, Outlook and Social Media Analytics & Programming: R, Python and SQL
